SUMMARY

Product designer who designs and also codes: token-based **Design Systems** in Figma, **transactional flows** (checkout, billing, and reconciliation), and **working prototypes** in code. Uses generative AI (LLMs, Cursor, Google AI Studio) to validate journeys early with stakeholders, and hands off work that engineering can actually use.

Experience --experience

2012 - NOW

UI/UX & AX Lead · Digital Product Consultant

2018 - NOW

Studio Erik Placido · Munchausen Criações

- **Design Systems:** Figma libraries built on variables and semantic tokens, kept in parity with Storybook.
- **Transactional flows:** progressive onboarding, Stripe Connect checkout, and automated billing.
- **A real product end to end:** an insurance inspection system, from flow to interface, web app, API, and reports.
- **AI-assisted prototyping:** Cursor, LLMs, and APIs to test the journey before development.

Senior Product & UI/UX Designer

2021 - 2025

Blue Facility Services · Sydney and Melbourne

- **Services marketplace:** customer app, field app with real-time GPS, and an operations console.
- **Live pricing** in the booking flow, calculated by floor area, to cut friction at checkout.
- **One design system** across desktop, tablet, and mobile, with a reusable component library.

Art Director · Tech Conferences

2012 - 2014

InfoQ · QCon São Paulo and Rio

- **Identity and wayfinding** for software engineering conferences, guiding the flow of thousands of attendees.

Case studies --cases

6 PROJECTS

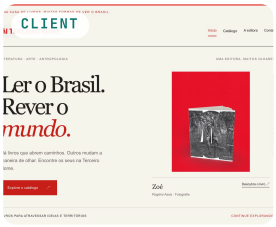

Blue Services

Marketplace with live pricing and GPS

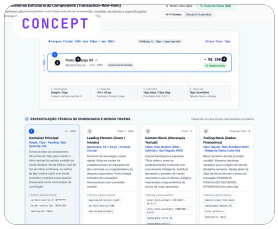

Vistorias de Risco

Geotagged photo inspections and reports

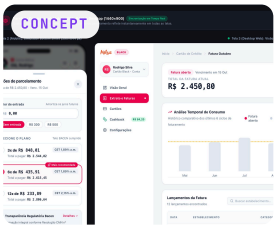

Editora Terceiro Nome

178-book catalog, search, and migration

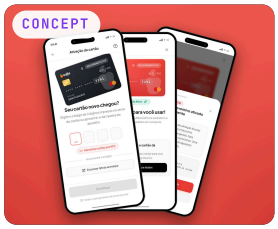

Conta Simples · Ledger

Component documented from token to code

Méliuz · Fatura

Installments with clear interest and fees

Caju · Cartão

NFC, QR, or code activation, 5 edge cases

Google UX Design Certificate
Google / Coursera · 2023 - 2024

BA in Graphic Design
FMU / FIAM-FAAM · 2003 - 2006

Stack --stack

SKILLS

design.system
- Figma Variables
- Tokens Studio
- Storybook handoff
- Component documentation

product.flow
- Transactional flows
- Progressive onboarding
- Usability testing
- iOS HIG and Material 3

a11y.states
- WCAG contrast
- States and edge cases
- Information hierarchy
- Responsive layout

code.ai
- HTML, CSS, and JS
- React prototypes
- Cursor and LLMs
- Google AI Studio
